

drinkspector™

Drinkspector™ by Shopguard is a patented antitheft solution that is capable of protecting bottled beverages more efficiently than anything else ever before. It is compatible with most EAS technologies (RF, AM, EM) and it is a universal tool to protect bottles of practically all shapes and sizes.

* Drinkspector

Drinkspector™ is a revolutionary security tag that is designed to protect bottled liquids. It is an innovative solution of Shopguard that combines commercial and product safety requirements in a well-designed form and shape.

Drinkspector™ protects branded quality drinks placed on the shelf in a self-service environment. Using it in combination with an electronic tagging system (RF, AM, EM) it effectively protects valuable bottles from thieves.

Drinkspector™ is tamperproof and cannot be removed by force after its installation. With the help of the polycarbonate bottle cap access to the contents of the bottle is prevented.

Drinkspector™ is capable of protecting almost any kind of bottle. It increasingly resists peeling and straining movements. On the basis of measurements it was proven that it easily bears a pulling load of 100 kgs (225 pounds).

Drinkspector™ increases sales. Usually premium bottles are behind glass or put away in safe place. Using drinkspector allows these to be merchandised, having immediate impact on increasing sales.

Drinkspector™ is an advanced and reassuring solution to protect beverages exposed to theft. Install this state of the art loss prevention solution in your own shop now!

* 7 convincing arguments
